REFERENCE CASE

Modern Times Group – Viasat Sports, Stockholm Sweden
Three HD Sports Channel Play-out and Router Expansion

Customer Name:

Modern Times Group - Viasat Sports
MTG Broadcast Centre
Stockholm Sweden
Gustaf Söderberg, Senior Manager

This project covered the turnkey delivery, installation, and commissioning of hardware to support three new HD-TX Sports Channels installed at the MTG Broadcast Centre in Stockholm. These three new channels add to the six existing channels played out at the Viasat BRC Center.

The Playout System included three Imagine Communications IconMaster Switchers with VIZ-RT Logo Graphics, all under Pebble Beach Control. The Pebble Beach was expanded with eight additional redundant control ports as well as the AirProtect mirrored video server for port protection.

To support the Golf HD Channel, multiple Imagine APM-6803+ cards provided for extensive audio processing and mixing that included Dolby Decoding and Encoding.

The existing Imagine Platinum IP3 Router was greatly expanded with 72 inputs and over 100 outputs via Trompeter video jackfields and an additional Multiviewer was installed.

The project also included multiple Ericsson RX-8200 IRDs with video and audio handling using the Grass Valley XVP series processing cards. Other Infrastructure improvements included the Clearcom VOICE2 4 channel IP Intercom and expansion of the reference sync system.
